(NOTE — The passing efficiency formula has been used by the NCAA since 1979 to rate quarterbacks. The formula assumes that touchdowns are as good as interceptions are bad; therefore, these two figures offset each other for the average player. To determine Efficiency Rating Points, multiply a passer's yards per attempt by 8.4, add his completion percentage, add his touchdown percentage times 3.3, then subtract his interception percentage times two. 100 points is considered average.)

THE ASSOCIATED PRESS RANKINGS

Beginning in 1936, the Associated Press polled a group of broadcasters and sports writers from around the nation, asking them to rank the various college football teams. Although other polls have come and gone, the AP's is the only one that has run in the nation's newspapers every year since 1936.

From this point forward, AP rankings for Missouri and its opponents are listed. A number in parenthesis appearing before an opponent's name indicates Missouri's ranking. A number in parenthesis appearing after an opponent's name is its ranking. "R" indicates a team was receiving votes.
